

Griddle Cake Machine

<i>Model</i>	<i>Maximum product size</i>	<i>Output/hour</i>	<i>Length</i>	<i>Width</i>	<i>Height</i>	<i>Weight</i>
1000 GC	3.75 inch round	13,020	36 feet	87 inches	103 inches	31,450 lbs
1500 GC	3.75 inch round	26,040	36 feet	117 inches	103 inches	55,540 lbs

- Logos or brand symbols can be cooked into the top of the Griddle cake's golden brown crust.
- Griddle cake cooker plates are made from CNC machined metal and are 100% NON STICK COATING free.
- Oil can be applied by sprayer or our innovative brush on method to accurately apply oil to the molds.
- Much smaller environmental footprint due to efficient plate heating system & no non stick coating maintenance.
- No more carbon on the griddle cakes because our griddle plates are continuously cleaned as part of the process.
- Flashing is controlled by our innovative griddle plate sealing method & controllable anti flashing system.
- Servo controlled batter depositing is accurate to +or- 0.3 gm and easily removed from the griddle for cleaning.
- The Griddle cake maker is controlled by an Allen Bradley PLC/Servo system and interfaced with a panel view.
- All our griddles have a lockable recipe control system, no more manual set point entry or unauthorized changes.
- The griddle has an automatic ignition, temperature and flame monitoring system for trouble free operation.
- All electrical systems are Allen Bradley, motors by SEW and burner components from Maxon and Honeywell.
- TSA is committed to continual improvement providing our customers with simple, efficient and reliable systems.
